CORE SKILLS

Linux & Unix

- Red Hat Linux
- System Engineering
- System Administration

Cloud & DevOps

- AWS
- Azure
- Docker
- Terraform
- Ansible
- GitLab
- CI/CD

Networking

- Cisco
- MPLS
- Metro Ethernet
- SNMP

Programming

- Python
- Bash
- Gleam

Blockchain

- Flare Network
- Songbird
- EVM
- FTSO

Platforms & Tools

- Elastic Stack
- HPC
- Streamlit

AI & Current Projects

- Yabby.bot
- Agentic AI
- Gleam
- Erlang BEAM
- TurfOps.run
- ML/XGBoost
- Claude Code
- MCP

PROFILE

Experienced Linux Infrastructure and Systems Engineer with over 25 years in IT, spanning Unix/Linux system engineering, cloud platforms, networking, and telecommunications. Currently providing Linux engineering services for federal government clients and operating blockchain infrastructure through FTSO Express. Skilled in automation, infrastructure as code, and enterprise system administration. Currently making the transition into AI.

EXPERIENCE

Linux Engineer Jul 2024 – Present

Services Australia (via Palisades Australia)

Yeppoon, QLD · Remote

- Linux Engineer at Services Australia
