Dustin Lee

Profile

I am a passionate software developer with expertise in building web applications. I enjoy working with modern technologies and creating efficient, scalable solutions. When I am not coding, I like to explore new technologies and contribute to open-source projects.

Skills

Programming Languages

Proficient in multiple programming languages including Python, JavaScript, Go, and Java.

Web Development

Experienced in building modern web applications using React, Vue.js, and Node.js.

Cloud Computing

Working knowledge of cloud platforms like AWS, Google Cloud, and Azure.

DevOps

Experience with Docker, Kubernetes, CI/CD pipelines, and infrastructure as code.

Database

Skilled in both SQL (PostgreSQL, MySQL) and NoSQL (MongoDB, Redis) databases.

Version Control

Experienced with git-based development workflow and version control.

Experience

Senior Software Developer — Example Tech Company

Jan 2023 – Present | Remote

- Design and develop scalable web applications
- Lead technical discussions and architecture decisions
- Mentor junior developers and conduct code reviews
- Collaborate with cross-functional teams to deliver features

Software Developer — Tech Startup Inc

Jun 2020 – Dec 2022 | San Francisco, CA

- Developed and maintained REST APIs using Node.js and Python
- Implemented front-end features using React and TypeScript
- Worked with AWS services including Lambda, S3, and DynamoDB
- Participated in agile development processes

Junior Developer — Digital Solutions Ltd

Jan 2018 – May 2020 | New York, NY

- Built web applications using modern JavaScript frameworks
- Wrote unit and integration tests
- Collaborated with designers to implement UI/UX designs
- Participated in daily standups and sprint planning

Education

Bachelor of Science in Computer Science

Example University | 2014 – 2018

- Research on Distributed Systems
- Participated in ACM programming competitions
- Member of Computer Science Club
- Organised tech workshops for students

Projects

E-Commerce Platform

A full-stack e-commerce platform built with modern technologies.
Lead Developer | Jan 2023 – Present

DevOps Automation Tool

An automation tool for streamlining CI/CD pipelines and infrastructure management.
Contributor | Jun 2022 – Dec 2022

API Gateway Service

A high-performance API gateway service built with Go and deployed on Kubernetes.
Developer | Sep 2021 – Feb 2022
